

# Компактный цилиндр с направляющими MGP

- Повышенное сопротивление боковым нагрузкам
- Превосходная защита от проворота
- Экономит место при монтаже
- Возможно исполнение с длинным ходом

## Монтаж

## Монтаж датчиков положения

## 2 вида направляющих

### Направляющая скольжения

Повышенное сопротивление боковым нагрузкам

### Направляющая качения

или прецизионная направляющая качения

Линейные движения с малым трением для перемещений требующих большой точности

## 2 варианта подвода сжатого воздуха

# Компактный цилиндр с направляющими

## MGP

∅12~100

### Технические характеристики

Принцип действия	Двустороннего действия	
Среда	Очищенный сжатый воздух, с содержанием или без содержания масла	
Испытательное давление (МПа)	1.5	
Макс. рабочее давление (МПа)	1.0	
Мин. рабочее давление (МПа)	∅12, ∅16	0.12
	∅20 ~ ∅100	0.1
Температура рабочей и окружающей среды (°C)	-10 ~ 60	
Скорость хода поршня (мм/с)	∅12 – ∅63	50 ~ 500
	∅80, ∅100	50 ~ 400
Демпфирование	Упругие демпфирующие шайбы с двух сторон	
Допуск по длине хода (мм)	+1.5 / 0

## Указания

### Общие указания

- 1) Перед монтажом цилиндров следует тщательно продувать подводящие воздух отверстия сжатым воздухом с целью удаления загрязнений.
- 2) Следует избегать появления царапин на поверхности направляющих и поршневых штоков. Иначе на уплотнениях могут образоваться дефекты, приводящие к негерметичности и неправильной работе цилиндров.
- 3) При использовании смазки следует применять тип ISO VG32. Нельзя пользоваться шпиндельным или машинным маслом.

### Указания по монтажу цилиндров

Направляющие штоки у некоторых типов во втянутом состоянии выступают вперед. Если цилиндр крепится за основание, следует предусмотреть наличие отверстия для беспрепятственного прохождения направляющих штоков.

При использовании в качестве стопорных цилиндров следует применять винты с длиной ввинчивания не менее 2 d.

Допуск на проворот пластины

Ø цилиндра	Без прогиба направляющего штока		
	MGPM	MGPL	MGPA
12 / 16	±0.07°	±0.05°	±0.01°
20 / 25	±0.06°	±0.04°	
32 / 40	±0.05°	±0.03°	
50 / 63	±0.04°	±0.03°	
80 / 100	±0.03°	±0.03°	

Допуски на проворот концевых фланцев указаны для ненагруженного состояния с втянутым поршнем.

Если в выдвинутом состоянии возникают нагрузки (например момент вращения), то величина прогиба направляющего штока суммируется с указанными значениями допусков.

## Цилиндры, применяемые в качестве стопорных

Цилиндры Ø 12-25 / MGPМ (направляющие скольжения)

- В качестве стопорных цилиндров могут использоваться только цилиндры с длиной хода до 30 мм.
- Модификации с направляющей качения MGPL и MGPA не должны использоваться в качестве стопорного цилиндра.
- Если требуется увеличить размер свыше 50 мм, используйте цилиндр большего диаметра.

Цилиндры Ø 32-100 / MGPМ (направляющие скольжения)

- В качестве стопорных цилиндров могут использоваться только цилиндры с длиной хода до 50 мм.
- Модификации с направляющей качения MGPL и MGPA не должны использоваться в качестве стопорного цилиндра.
- Если требуется увеличить размер свыше 50 мм, используйте цилиндр большего диаметра.

# Компактный цилиндр с направляющими MGP

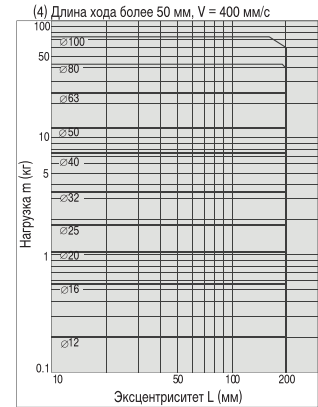

## Цилиндры, применяемые для вертикального перемещения грузов

Цилиндр должен выбираться таким образом, чтобы суммарная нагрузка составляла 40~60% от теоретического усилия на штоке.

Ø поршня	Допустимая нагрузка W
Ø12, 16	< 40% от теор. усилия на штоке
Ø20, 25	< 50% от теор. усилия на штоке
Ø32~100	< 60% от теор. усилия на штоке

## Размеры

Ø12~25  
MGRM / MGPL / MGPA

### Примечание

- Ряд стандартных ходов поставляемых цилиндров составлен с шагом 10 и 25 мм.
- Для промежуточных (нестандартных) значений ходов используются упорные шайбы. Корпус в этом случае имеет размер ближайшего в сторону увеличения значения стандартной длины хода.

Компания SMC сохраняет за собой право на внесение технических и размерных изменений

# Компактный цилиндр с направляющими MGR

## Размеры

Ø32~63  
MGRM / MGRL / MGRA

### Примечание

1. Ряд стандартных ходов поставляемых цилиндров составлен с шагом 10 и 25 мм.
2. Для промежуточных (нестандартных) значений ходов используются упорные шайбы. Корпус в этом случае имеет размер ближайшего в сторону увеличения значения стандартной длины хода.

## Датчики положения

### Герконовые датчики

Электронные датчики положения М9N(V)L, М9P(V)L, М9В(V)L и герконовые датчики положения А90(V)L, А93(V)L, А96(V)L устанавливаются в профильных пазах цилиндра.

Характеристики датчиков приведены в разделе «Универсальные датчики положения»

### Монтажное положение датчиков и зона переключения

### Монтаж датчиков положения

Датчик монтируют в предусмотренной для этого канавке, как это показано на рисунке внизу.

# Compact Guide Cylinder

ø12, ø16, ø20, ø25, ø32, ø40, ø50, ø63, ø80, ø100

Up to  
**17%**  
Weight  
reduced!

Weight reduced by up to 17% with  
a shorter guide rod and thinner plate

- With air cushion
- Water resistant cylinder are now available.

New

With air cushion

New

Water resistant cylinder

Guide rod shortened  
for MGPM40-25 stroke

Max. **22mm**

Space required between the  
bottom of the cylinder body and  
your equipment is reduced.

Space saving

Round type and magnetic field resistant auto switches are mountable directly without spacer.

3 types of bearing can be selected.

- Slide bearing Series MGPM
- Ball bushing Series MGPL
- High precision ball bushing Series MGPA

Made to Order

Change of guide rod end shape (-XA□), intermediate stroke (-XB10), low speed cylinder (-XB13), side porting type (-X867), made of stainless steel (-XC6), adjustable stroke cylinder/adjustable extension type (-XC8), and with coil scraper (-XC35) etc. are now available.

Series **MGP**

CAT.EUS20-219C-UK

# Compact Guide Cylinder

**3 types of bearing can be selected.**

## Slide bearing Series MGPM

Suitable for lateral load applications such as a stopper where shock is applied

Slide bearing

## Ball bushing Series MGPL

Smooth operation suitable for pusher and lifter

Ball bushing

## High precision ball bushing Series MGPA

Suitable for minimising plate displacement

High precision ball bushing

## Basic Type

### Weight reduced

Bore size [mm]	Reduction rate [%]	Weight [kg]
ø12	11	0.25
ø16	3	0.37
ø20	12	0.59
ø25	12	0.84
ø32	17	1.41
ø40	16	1.64
ø50	17	2.79
ø63	17	3.48
ø80	17	5.41
ø100	13	9.12

\* Compared with the slide bearing type, ø12 to ø25-20 stroke  
\* Compared with the slide bearing type, ø32 to ø100-25 stroke

### Guide rod shortened

Bore size	Guide rod [mm]	
	Shortened by	New dimension
ø32	22	15.5
ø40	22	9
ø50	18	16.5
ø63	18	11.5
ø80	10.5	8
ø100	10.5	10.5

\* Compared with the slide bearing type, 25 stroke (ø32 to ø100)  
(No projection for ø12 to ø25-25 stroke)

Performance and strength (rigidity) are equivalent to the conventional MGP series.

Mounting dimensions are equivalent to the conventional MGP series.

## Series MGP (Basic Type), Stroke Variations

Bearing type	Bore size [mm]	Stroke [mm]														Made to Order			
		10	20	25	30	40	50	75	100	125	150	175	200	250	300		350	400

\* Refer to front matter 1 for details.

Small auto switches or magnetic field resistant auto switches can be mounted on **2 surfaces**.

D-M9□

D-A9□

D-P3DW

\* The D-Y7 and D-Z7 auto switches are not mountable.

**4 types of mounting are possible.**

Easy positioning  
Knock pin holes provided on each mounting surface

**1. Top mounting**

**2. Side mounting**

**4. Bottom mounting**

**3. T-slot side mounting**

Easy adjustment of workpiece and cylinder mounting

Piping is possible from **2 directions**.

**1. Top ported**

**2. Side ported**

## New With Air Cushion

Weight reduced by up to **24%**

Guide rod shortened by up to **35.5 mm** (MGPM100-50)

Bore size [mm]	Reduction rate [%]	Weight [kg]
ø16	12	1.28
ø20	18	1.91
ø25	22	2.52
ø32	24	3.57
ø40	23	4.13
ø50	23	6.56
ø63	22	8.04
ø80	21	11.35
ø100	19	17.72

\* Compared with the conventional MGPM with air cushion, 200 stroke

Bore size	Guide rod [mm]	
	Shortened by	New dimension
ø32	33.5	9
ø40	33.5	2.5
ø50	22	12.5
ø63	22	7.5
ø80	35.5	10
ø100	35.5	10.5

\* Compared with the conventional MGPM with air cushion, 50 stroke

Performance and strength are equivalent to the conventional MGP series with air cushion.

Mounting dimensions are equivalent to the conventional MGP series with air cushion.

Basic Type

MGP

With Air Cushion

MGP

Auto Switch

Made to Order

Note 1) Consult SMC for details.

Note 2) Without cushion

Note 3) Copper and fluorine-free are available as standard products.

# Series MGP Specific Product Precautions 1

Be sure to read before handling. Refer to back cover for Safety Instructions.  
For Actuator and Auto Switch Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on SMC website, <http://www.smcworld.com>

## Mounting

### Warning

1. Never place your hands or fingers between the plate and the body.

Be very careful to prevent your hands or fingers from getting caught in the gap between the cylinder body and the plate when air is applied.

### Caution

1. Use cylinders within the piston speed range.

An orifice is set for this cylinder, but the piston speed may exceed the operating range if the speed controller is not used. If the cylinder is used outside the operating speed range, it may cause damage to the cylinder and shorten the service life. Adjust the speed by installing the speed controller and use the cylinder within the limited range.

2. Pay attention to the operating speed when the product is mounted vertically.

When using the product in the vertical direction, if the load factor is large, the operating speed can be faster than the control speed of the speed controller (i.e. quick extension). In such cases, it is recommended to use a dual speed controller.

3. Do not scratch or gouge the sliding portion of the piston rod and the guide rod.

Damaged seals etc. will result in leakage or malfunction.

4. Do not dent or scratch the mounting surface of the body and the plate.

The flatness of the mounting surface may not be maintained, which would cause an increase in sliding resistance.

5. Make sure that the cylinder mounting surface has a flatness of 0.05 mm or less.

If the flatness of the workpieces and brackets mounted on the plate is not appropriate, sliding resistance may increase.

If it is difficult to maintain a flatness of 0.05 or less, put a thin shim ring (prepared by user) between the plate and workpiece mounting surface to prevent the sliding resistance from increasing.

## Mounting

### Caution

6. Bottom of cylinder

The guide rods protrude from the bottom of the cylinder at the end of the retracting stroke, and therefore, in cases where the cylinder is to be bottom mounted, it is necessary to provide bypass ports in the mounting surface for the guide rods, as well as holes for the hexagon socket head cap screws which are used for mounting. Moreover, in applications where impact occurs from a stopper etc., the mounting screws should be inserted to a depth of 2d or more.

Bore size [mm]	A [mm]	B [mm]	C [mm]	D [mm]		Hexagon socket head cap screw
				MGPM	MGPL/A	
12*	50	18	41	10	8	M4 x 0.7

## Specific Product Precautions 2

Be sure to read before handling. Refer to back cover for Safety Instructions.  
 For Actuator and Auto Switch Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on SMC website, <http://www.smcworld.com>

Basic Type MGP

With Air Cushion MGP

Auto Switch

Made to Order

### Piping

#### ⚠ Caution

Depending on the operating conditions, piping port positions can be changed by using a plug.

##### 1. M5

After tightening by hand, tighten additional 1/6 to 1/4 rotation with a tightening tool.

##### 2. Tapered thread for Rc port (MGP) and NPT port (MGP□□TN)

Use the correct tightening torques listed below. Before tightening the plug, wrap pipe tape around it. Also, with regard to the sunk dimension of a plug (dimension "a" in the drawing), use the stipulated figures as a guide and confirm the air leakage before operation.

\* If tightening plugs on the top mounting port with more than the proper tightening torque, plugs will be screwed much deeply and air passage will be squeezed. Consequently, the cylinder speed will be restricted.

Connection thread (plug) size	Proper tightening torque [N·m]	a dimension
1/8	7 to 9	0.5 mm or less
1/4	12 to 14	1 mm or less
3/8	22 to 24	1 mm or less

##### 3. Parallel pipe thread for G port (MGP□□TF)

Screw in the plug to the surface of the body (dimension "a" in the drawing) by checking visually instead of using the tightening torque shown in the table.

### Cushion

#### With air cushion

#### ⚠ Warning

##### 1. Do not open the cushion valve excessively.

Air leakage will occur if operated after opening by 4 rotations or more. Furthermore, a stopper mechanism is provided for the cushion valve, and it should not be forced open beyond that position. Be aware that the cushion valve may jump up from the cover when the air is supplied.

#### ⚠ Caution

##### 1. Be sure to use the cylinder after the air cushion has been adjusted appropriately.

First, fully close the cushion valve. Start the operation at the cylinder speed to be used with the load applied, and then open the cushion valve gradually to make the adjustment. The optimal adjustment is that the piston reaches its stroke end and the collision sound is minimized. If the cushion valve is used without adjusting the air cushion appropriately, this may cause damage to the retaining ring or piston.

Bore size [mm]	Applicable tool
16, 20, 25, 32, 40	JIS B4648 hexagon wrench key 1.5
50, 63, 80, 100	JIS B4648 hexagon wrench key 3

##### 2. Be sure to operate a cylinder equipped with air cushion to the end of the stroke.

If it is not operated to the end of the stroke, the effect of the air cushion will not be fully exhibited. Consequently, in cases where the stroke is regulated by an external stopper etc., caution must be exercised, as the air cushion may become completely ineffective.

### Allowable Kinetic Energy

#### ⚠ Caution

Load weight and a maximum speed must be within the ranges shown in the graph below.

#### MGP with Rubber Bumper

#### MGP with Air Cushion

\*\*\* Water resistant type auto switches are mountable on the above models, but in such case SMC cannot guarantee water resistance.

A water resistant type cylinder is recommended for use in an environment which requires water resistance.

However, please contact SMC for water resistant products of ø12 and ø16.

\* Lead wire length symbols: 0.5 m..... — (Example) M9NW      \* Solid state auto switches marked with "○" are produced upon receipt of order.  
 1 m..... M (Example) M9NWM      \*\* The D-P3DWA is mountable on bore size ø25 to ø100.  
 3 m..... L (Example) M9NWL  
 5 m..... Z (Example) M9NWZ

\* Since there are other applicable auto switches than listed above, refer to the Auto Switch Guide for details.

\* For details about auto switches with pre-wired connector, refer to the Auto Switch Guide.

For the D-P3DWA, refer to the D-P3DWA catalogue.

\* Auto switches are shipped together, (but not assembled).

<b>Maximum operating pressure</b>	1.0 MPa									
<b>Minimum operating pressure</b>	0.12 MPa	0.1 MPa								
<b>Ambient and fluid temperature</b>	-10 to 60°C (No freezing)									
<b>Piston speed</b> <small>Note)</small>	50 to 500 mm/s								50 to 400 mm/s	
<b>Cushion</b>	Rubber bumper on both ends									
<b>Lubrication</b>	Not required (Non-lube)									
<b>Stroke length tolerance</b>	$^{+1.5}_0$ mm									

Note) Maximum speed with no load.

Make a model selection, considering a load according to the graph on pages 9 to 15.

## Standard Strokes

Bore size [mm]	Standard stroke [mm]
12, 16	10, 20, 30, 40, 50, 75, 100, 125, 150, 175, 200, 250
20, 25	20, 30, 40, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400
32 to 100	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400

## Manufacture of Intermediate Strokes

Description	Spacer installation type	Exclusive body (-XB10)
	Spacers are installed in the standard stroke cylinder. • $\phi 12$ to $\phi 32$ : Available by the 1 mm stroke interval. • $\phi 40$ to $\phi 100$ : Available by the 5 mm stroke interval.	Dealing with the stroke by making an exclusive body. • All bore sizes are available by the 1 mm interval.
<b>Model no.</b>	Refer to "How to Order" for the standard model numbers.	Add "-XB10" to the end of standard model number. For details, refer to "Made to Order."
<b>Applicable stroke [mm]</b>	$\phi 12, \phi 16$ 1 to 249 $\phi 20, \phi 25, \phi 32$ 1 to 399 $\phi 40$ to $\phi 100$ 5 to 395	$\phi 12, \phi 16$ 11 to 249 $\phi 20, \phi 25$ 21 to 399 $\phi 32$ to $\phi 100$ 26 to 399
<b>Example</b>	Part no.: MGPM20-39Z A spacer 1 mm in width is installed in the MGPM20-40. C dimension is 77 mm.	Part no.: MGPM20-39Z-XB10 Special body manufactured for 39 stroke. C dimension is 76 mm.

## Non-rotating Accuracy of Plate

Non-rotating accuracy  $\theta$  when retracted and when no load is applied should be not more than the values shown in the table.

Bore size [mm]	Non-rotating accuracy $\theta$		
	MGPM	MGPL	MGPA
12	$\pm 0.07^\circ$	$\pm 0.05^\circ$	$\pm 0.01^\circ$
16			
20	$\pm 0.06^\circ$	$\pm 0.04^\circ$	
25			
32	$\pm 0.05^\circ$	$\pm 0.03^\circ$	
40			
50	$\pm 0.04^\circ$	$\pm 0.03^\circ$	
63			
80	$\pm 0.03^\circ$	$\pm 0.03^\circ$	
100			

## High Precision Ball Bushing/MGPA

### ⚠ Caution

#### Positioning accuracy for pin hole on the plate

Dispersion of dimensions when machining each component will be accumulated in the plate pin hole positioning accuracy when mounting this cylinder. Values below are referred as a guide.

[Side mounting]

$$A = \text{[Catalogue dimension]} \pm^* (0.1 + L_1 \times 0.0008) \text{ [mm]}$$

\* : To be 0.15 for  $\phi 80$ ,  $\phi 100$

Note) Displacement by load and self-weight deflection by plate and guide rod are not included.

[Bottom mounting]

$$B = \pm (0.045 + L_2 \times 0.0016) \text{ [mm]}$$

## High Precision Ball Bushing/MGPA Plate Displacement Amount (Reference Values)

### MGPA12

### MGPA32, 40

### MGPA16

### MGPA50, 63

### MGPA20

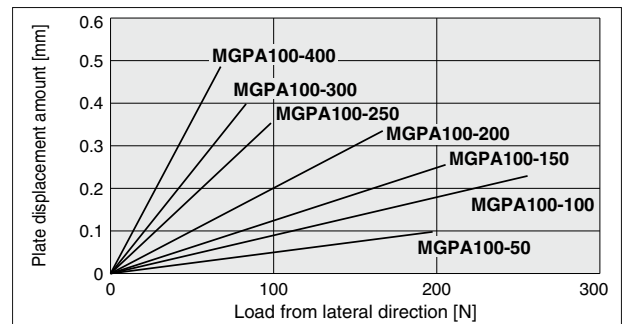

### MGPA80

### MGPA25

### MGPA100

Note 1) The guide rod and self-weight for the plate are not included in the above displacement values.

Note 2) Allowable rotating torque, and operating range when used as a lifter, are the same as those of the MGPL series.

# Basic Type Series MGP Model Selection

## Selection Conditions

Mounting orientation	Vertical		Horizontal	
Maximum speed (mm/s)	200 or less	400	200 or less	400
Graph (Slide bearing)	(1), (2)	(3), (4)	(13), (14)	(15), (16)
Graph (Ball bushing)	(5) to (8)	(9) to (12)	(17), (18)	(19), (20)

### Selection Example 1 (Vertical Mounting)

#### Selection conditions

Mounting: Vertical  
Bearing type: Ball bushing  
Stroke: 30 stroke  
Maximum speed: 200 mm/s  
Load weight: 3 kg  
Eccentric distance: 90 mm

Find the point of intersection for the load weight of 3 kg and the eccentric distance of 90 mm on graph (5), based on vertical mounting, ball bushing, 30 stroke, and the speed of 200 mm/s.

→MGPL25-30Z is selected.

(5) 30 stroke or less,  $V = 200$  mm/s or less

### Selection Example 2 (Horizontal Mounting)

#### Selection conditions

Mounting: Horizontal  
Bearing type: Slide bearing  
Distance between plate and load centre of gravity: 50 mm  
Maximum speed: 200 mm/s  
Load weight: 2 kg  
Stroke: 30 stroke

Find the point of intersection for the load weight of 2 kg and 30 stroke on graph (13), based on horizontal mounting, slide bearing, the distance of 50 mm between the plate and load centre of gravity, and the speed of 200 mm/s.

→MGPM20-30Z is selected.

(13)  $L = 50$  mm,  $V = 200$  mm/s or less

· When the maximum speed exceeds 200 mm/s, the allowable load weight is determined by multiplying the value shown in the graph at 400 mm/s by the coefficient listed in the table below.

Max. speed	Up to 300 mm/s	Up to 400 mm/s	Up to 500 mm/s
Coefficient	1.7	1	0.6

· Use the "Guide Cylinder Selection Software", when the eccentric distance is 200 mm or more.

# Compact Guide Cylinder With Air Cushion

## Series *MGP*

ø16, ø20, ø25, ø32, ø40, ø50, ø63, ø80, ø100

### How to Order

**MGP M 32 - 50 AZ - M9BW -**

**Compact Guide Cylinder**

**Bearing type**

M	Slide bearing
L	Ball bushing
A	High precision ball bushing

**Bore size**

16	16 mm	50	50 mm
20	20 mm	63	63 mm
25	25 mm	80	80 mm
32	32 mm	100	100 mm
40	40 mm		

**Port thread type**

—	M5 x 0.8
	Rc
TN	NPT
TF	G

\* For bore size 16, only M5 x 0.8 is available.

**Auto switch**

—	Without auto switch (Built-in magnet)
---	---------------------------------------

\* For applicable auto switches, refer to the table below.

**Number of auto switches**

—	2 pcs.
S	1 pc.
n	n pcs.

**Made to Order**  
For details, refer to page 24.

**With air cushion**

**Cylinder stroke [mm]**  
Refer to "Standard Strokes" on page 24.

### Applicable Auto Switches/Refer to the Auto Switch Guide for further information on auto switches.

Type	Special function	Electrical entry	Indicator/light	Wiring (Output)	Load voltage		Auto switch model		Lead wire length [m]				Pre-wired connector	Applicable load

\*\*\* Water resistant type auto switches are mountable on the above models, but in such case SMC cannot guarantee water resistance.

A water resistant type cylinder is recommended for use in an environment which requires water resistance.

However, please contact SMC for water resistant products of ø12 and ø16.

\* Lead wire length symbols: 0.5 m..... — (Example) M9NV  
 1 m..... M (Example) M9NWM  
 3 m..... L (Example) M9NWL  
 5 m..... Z (Example) M9NWZ

\* Solid state auto switches marked with "○" are produced upon receipt of order.

\*\* The D-P3DWA is mountable on bore size ø25 to ø100.

\* Since there are other applicable auto switches than listed above, refer to the Auto Switch Guide for details.

\* For details about auto switches with pre-wired connector, refer to the Auto Switch Guide.

For the D-P3DWA, refer to the D-P3DWA catalogue.

\* Auto switches are shipped together, (but not assembled).

# Compact Guide Cylinder With Air Cushion *Series MGP*

## Specifications

Bore size [mm]	16	20	25	32	40	50	63	80	100
<b>Action</b>	Double acting								
<b>Fluid</b>	Air								
<b>Proof pressure</b>	1.5 MPa								
<b>Maximum operating pressure</b>	1.0 MPa								
<b>Minimum operating pressure</b>	0.15 MPa	0.12 MPa							
<b>Ambient and fluid temperature</b>	-10 to 60°C (No freezing)								
<b>Piston speed</b>	50 to 500 mm/s							50 to 400 mm/s	
<b>Cushion</b>	Air cushion on both ends (Without bumper)								
<b>Lubrication</b>	Not required (Non-lube)

## Standard Strokes

Bore size [mm]	Standard stroke [mm]
<b>16</b>	25, 50, 75, 100, 125, 150, 175, 200, 250
<b>20 to 63</b>	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400
<b>80, 100</b>	50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400

## Manufacture of Intermediate Strokes

<b>Description</b>	Intermediate strokes by the 1 mm interval are available by replacing collars of a standard stroke cylinder. Minimum manufacturable stroke $\phi 16$ to $\phi 63$ : 15 mm $\phi 80$ , $\phi 100$ : 20 mm Select a rubber bumper type, because the cushion effect is not obtainable for less than this stroke.	
<b>Model no.</b>	Add "-XC19" to the end of standard part number.	
<b>Applicable stroke [mm]</b>	$\phi 16$	15 to 249
	$\phi 20$ to $\phi 63$	15 to 399
	$\phi 80$ , $\phi 100$	20 to 399
<b>Example</b>	Part no.: MGPM20-35AZ-XC19 A collar 15 mm in width is installed in the MGPM20-50AZ. C dimension is 112 mm.	

Note) Intermediate stroke (by the 1 mm interval) based on an exclusive body will be available upon request for special.

## Theoretical Output

Bore size [mm]	Rod size [mm]	Operating direction	Piston area [mm <sup>2</sup> ]	Operating pressure [MPa]

Note) Theoretical output [N] = Pressure [MPa] x Piston area [mm<sup>2</sup>]

**Made to Order**  
(For details, refer to pages 44 to 55.)

Symbol	Specifications
<b>-XC19</b>	Intermediate stroke (Spacer type)
<b>-XC79</b>	Tapped hole, drilled hole, pinned hole machined additionally
<b>-XC85</b>	Grease for food processing equipment
<b>-X867</b>	Side porting type (Plug location changed)

Refer to pages 40 to 42 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Operating range
- Auto switch mounting brackets/Part no.

## High Precision Ball Bushing/MGPA

### Caution

**Positioning accuracy for pin hole on the plate**  
Dispersion of dimensions when machining each component will be accumulated in the plate pin hole positioning accuracy when mounting this cylinder. Values below are referred as a guide.

[Side mounting]

$$A = \text{Catalogue dimension} \pm (0.1 + L_1 \times 0.0008) \text{ [mm]}$$

\*: To be 0.15 for  $\phi 80$ ,  $\phi 100$

Note) Displacement by load and self-weight deflection by plate and guide rod are not included.

[Bottom mounting]

$$B = \pm (0.045 + L_2 \times 0.0016) \text{ [mm]}$$

## Non-rotating Accuracy of Plate

Non-rotating accuracy  $\theta$  when retracted and when no load is applied should be not more than the values shown in the table.

Bore size [mm]	Non-rotating accuracy $\theta$		
	MGPM	MGPL	MGPA
16	$\pm 0.07^\circ$	$\pm 0.05^\circ$	$\pm 0.01^\circ$
20	$\pm 0.06^\circ$	$\pm 0.04^\circ$	
25			
32	$\pm 0.05^\circ$	$\pm 0.03^\circ$	
40			
50	$\pm 0.04^\circ$	$\pm 0.03^\circ$	
63			
80	$\pm 0.03^\circ$	$\pm 0.03^\circ$	
100			

**High Precision Ball Bushing/MGPA Plate Displacement Amount (Reference Values)**

**MGPA16**

**MGPA50, 63**

**MGPA20**

**MGPA80**

**MGPA25**

**MGPA100**

**MGPA32, 40**

Note 1) The guide rod and self-weight for the plate are not included in the above displacement values.  
Note 2) Allowable rotating torque, and operating range when used as a lifter, are the same as those of the MGPA series.

Basic Type **MGP**

With Air Cushion **MGP**

Auto Switch

Made to Order

# With Air Cushion Series MGP Model Selection

## Selection Conditions

Mounting orientation	Vertical		Horizontal	
Maximum speed [mm/s]	200 or less	400	200 or less	400
Graph (Slide bearing)	(1), (2)	(3), (4)	(15), (16)	(17), (18)
Graph (Ball bushing)	(5) to (9)	(10) to (14)	(19), (20)	(21), (22)

### Selection Example 1 (Vertical Mounting)

#### Selection conditions

Mounting: Vertical  
Bearing type: Ball bushing  
Stroke: 75 stroke  
Maximum speed: 200 mm/s  
Load weight: 7 kg  
Eccentric distance: 70 mm

Find the point of intersection for the load weight of 7 kg and the eccentric distance of 70 mm on graph (5), based on vertical mounting, ball bushing, 75 mm stroke, and the speed of 200 mm/s.

→ **MGPL25-75AZ** is selected.

(5) 75 stroke or less,  $V = 200$  mm/s or less

### Selection Example 2 (Horizontal Mounting)

#### Selection conditions

Mounting: Horizontal  
Bearing type: Slide bearing  
Distance between plate and load centre of gravity: 40 mm  
Maximum speed: 400 mm/s  
Load weight: 8 kg  
Stroke: 100 stroke

Find the point of intersection for the load weight of 8 kg and 100 stroke on graph (17), based on horizontal mounting, slide bearing, the distance of 40 mm between the plate and load centre of gravity, and the speed of 400 mm/s.

→ **MGPM32-100AZ** is selected.

(17)  $L = 50$  mm,  $V = 400$  mm/s

· When the maximum speed exceeds 200 mm/s, the allowable load weight is determined by multiplying the value shown in the graph at 400 mm/s by the coefficient listed in the table below.

Maximum	Up to 300 mm/s	Up to 400 mm/s	Up to 500 mm/s
Coefficient	1.7	1	0.6

· Use the "Guide Cylinder Selection Software", when the eccentric distance is 200 mm or more.

## Vertical Mounting **Slide Bearing**

— Operating pressure 0.4 MPa  
 - - - - Operating pressure 0.5 MPa or more

### MGPM16 to 100

(1) 25 stroke, V = 200 mm/s or less

(2) Over 25 stroke, V = 200 mm/s or less

(3) 25 stroke, V = 400 mm/s

(4) Over 25 stroke, V = 400 mm/s

· Use the "Guide Cylinder Selection Software", when the eccentric distance is 200 mm or more.

## Ø16 to Ø25/MGPM, MGPL, MGPA (With Air Cushion)

- \* The use of a slot (width XA, length XB, depth 3) allows for a relaxed pin pitch tolerance, with the pin hole (ØXA<sub>H7</sub>, depth 6) as the reference, without affecting mounting accuracy.
- \* For intermediate strokes other than standard strokes, refer to "Manufacture of Intermediate Strokes" on page 24.
- \* For bore size Ø16, only M5 x 0.8 port is available.
- \* For bore size Ø20 or more, choice of Rc, NPT, G port is available. (Refer to page 23.)

D-P3DWA	1 pc.	—			15						
	2 pcs.	—			15						

Note 1) Confirm that it is possible to secure the minimum bending radius of 10 mm of the auto switch lead wire before use.

Note 2) Confirm that it is possible to securely set the auto switch(es) within the range of indicator green light ON range before use.

For in-line entry type, also consider Note 1) shown above.

Note 3) The D-P3DWA is mountable on bore size ø25 to ø100.

## Operating Range

Auto switch model	Bore size									
	12	16	20	25	32	40	50	63	80	100
D-M9□/M9□V D-M9□W/M9□WV D-M9□A/M9□AV	3.5	5	5	5	6	6	6	6.5	6	7
D-A9□/A9□V	7	9	9	9	9.5	9.5	9.5	11	10.5	10.5
D-P3DWA	—	—	—	5	6	6	6	6	6	7

\* Values which include hysteresis are for guideline purposes only, they are not a guarantee (assuming approximately ±30% dispersion) and may change substantially depending on the ambient environment.

**Other than the applicable auto switches listed in “How to Order”, the following auto switches are mountable.**

Consult SMC for detailed specifications.

Type	Model	Electrical entry	Features
Solid state	D-P4DW	Grommet (In-line)	Magnetic field resistant (2-colour display) Bore size: ø32 to ø100

\* With pre-wired connector is also available for solid state auto switches.

For details, consult SMC.

\* Normally closed (NC = b contact) solid state auto switches (D-F9G/F9H) are also available.

For details, consult SMC.

\* When installing the D-P4DW, use the BMG7-032 auto switch mounting bracket.

## Auto Switch Mounting Brackets/Part No.

## Auto Switch Connection and Example

### Sink Input Specifications

#### 3-wire, NPN

#### 2-wire

### Source Input Specifications

#### 3-wire, PNP

#### 2-wire

Connect according to the applicable PLC input specifications, as the connection method will vary depending on the PLC input specifications.

### Example of AND (Series) and OR (Parallel) Connection

\* When using solid state auto switches, ensure the application is set up so the signals for the first 50 ms are invalid.

#### 3-wire AND connection for NPN output (Using relays)

#### (Performed with auto switches only)

#### 3-wire OR connection for NPN output

#### 3-wire AND connection for PNP output (Using relays)

#### (Performed with auto switches only)

#### 3-wire OR connection for PNP output

#### 2-wire AND connection

When two auto switches are connected in series, a load may malfunction because the load voltage will decline when in the ON state. The indicator lights will light up when both of the auto switches are in the ON state. Auto switches with load voltage less than 20 V cannot be used.

$$\begin{aligned} \text{Load voltage at ON} &= \text{Power supply voltage} - \\ &\quad \text{Residual voltage} \times 2 \text{ pcs.} \\ &= 24 \text{ V} - 4 \text{ V} \times 2 \text{ pcs.} \\ &= 16 \text{ V} \end{aligned}$$

Example: Power supply is 24 VDC  
Internal voltage drop in auto switch is 4 V.

#### 2-wire OR connection

(Solid state)  
When two auto switches are connected in parallel, malfunction may occur because the load voltage will increase when in the OFF state.

(Reed)  
Because there is no current leakage, the load voltage will not increase when turned OFF. However, depending on the number of auto switches in the ON state, the indicator lights may sometimes grow dim or not light up, due to the dispersion and reduction of the current flowing to the auto switches.

$$\begin{aligned} \text{Load voltage at OFF} &= \text{Leakage current} \times 2 \text{ pcs.} \times \\ &\quad \text{Load impedance} \\ &= 1 \text{ mA} \times 2 \text{ pcs.} \times 3 \text{ k}\Omega \\ &= 6 \text{ V} \end{aligned}$$

Example: Load impedance is 3 kΩ.  
Leakage current from auto switch is 1 mA.

## 1 Change of Guide Rod End Shape

**-XA1/6/17/21**

### Applicable Series

Series	Model	Bearing type	Symbol for change of rod end shape
MGP-Z	Standard type	MGPM	Slide bearing
		MGPL	Ball bushing
		MGPA	High precision ball bushing
			XA1, 6, 17, 21
			XA1, 6

### Precautions

- Ensure that the cylinder's overall length should not exceed the allowable overall length. In the case of exceeding the allowable overall length, it will be available as specials.
- In Fig. (1), (2) below, E' dimension cannot make it into E dimension or less of the standard products. Confirm by referring to catalogue.
- SMC will make appropriate arrangements if no dimension, tolerance, or finish instructions are given in the diagram.
- \* dimension should be the guide rod diameter (D) – 2 mm. In the case that the preferred dimension is different, fill in that dimension.

[mm]

Fig. (1) XA1, XA6

**2 Tapped Hole, Drilled Hole, Pinned Hole Machined Additionally**

Symbol  
**-XC79**

This simple special is meant for machining additionally tapped hole, drilled hole, and pinned hole, as requested from customer, on parts designed largely for mounting a workpiece etc. in the combined air cylinders.

But, for each model, since they have the portions which are impossible to machine additionally, refer to the additional machining limitation.

**Applicable Series**

Series	Model	Bearing type	Component parts applicable for additional machining	
MGP-Z	Standard type	MGPM	Slide bearing	
		MGPL	Ball bushing	
		MGPA	High precision ball bushing	
	With air cushion	MGPM	Slide bearing	Plate
		MGPL	Ball bushing	
		MGPA	High precision ball bushing	

**Precautions**

- We cannot take any responsibility as for the intensity of holes machined additionally and the effects of decreased intensity for the product itself.
- It will not be plated again for the machined part additionally.
- Be sure to fill in "through" for through-hole, and "effective depth" for blind hole.
- When using by machining through-hole additionally, ensure that the tip of the bolt etc. for mounting workpiece should not stick into the cylinder side. It may result in an unexpected problem.
- Use caution not to interfere the existing mounting hole on the standard products with the hole to be machined additionally. But it is possible to drill additionally the larger size of hole at the same position as the existing hole.

**Common Complementary Explanation/Holes which can be additionally machined are the following 3 types.**

Tapped hole	Drilled hole	Pinned hole												
<p>Designated nominal diameter and tapped hole of a pitch are machined additionally. (Maximum nominal thread diameter M20)</p> <p>Blind hole is deep into the bottom of prepared hole which sums up A to C in the figure below in contrast to the effective depth of tapped hole. When there is a condition which does not allow through-hole etc., leave sufficient thickness in the inner part of hole.</p>	<p>Drilled hole of a designated internal diameter is machined. (Maximum hole diameter 20 mm)</p> <p>If you wish for blind hole, instruct us with effective depth. (Refer to the figure below.) Besides, dimensional accuracy for internal diameter will be <math>\pm 0.2</math> mm.</p>	<p>Pinned hole of a designated diameter (reamer hole) is machined. (Maximum hole diameter 20 mm)</p> <p>Internal dimension tolerates H7 tolerance to the designated hole diameter. (Refer to the table below.)</p> <table border="1"> <thead> <tr> <th>Hole dia.</th> <th>3 or less</th> <th>Over 3 to 6</th> <th>Over 6 to 10</th> <th>Over 10 to 18</th> <th>Over 18 to 20</th> </tr> </thead> <tbody> <tr> <td>Tolerance</td> <td>+0.01 0</td> <td>+0.012 0</td> <td>+0.015 0</td> <td>+0.018 0</td> <td>+0.021 0</td> </tr> </tbody> </table>	Hole dia.	3 or less	Over 3 to 6	Over 6 to 10	Over 10 to 18	Over 18 to 20	Tolerance	+0.01 0	+0.012 0	+0.015 0	+0.018 0	+0.021 0
Hole dia.	3 or less	Over 3 to 6	Over 6 to 10	Over 10 to 18	Over 18 to 20									
Tolerance	+0.01 0	+0.012 0	+0.015 0	+0.018 0	+0.021 0									

**Limitation for Machining Additionally** Since the slanted lines denote the restricted range for machining additionally, design the dimensions, referring to below.

Plate material: Steel

Bore size	Dimensional Range Not Possible to Machine Additionally [mm]		
	A	B	C
12	8	11	41
16	10	13	46
20	12	15	54

## 1 Heat Resistant Cylinder (−10 to 150°C)

Symbol

**-XB6**

Air cylinder which changed the seal material and grease, so that it could be used even at higher temperature up to 150 from −10°C.

### Applicable Series

Series	Model	Bearing type
<b>MGP-Z</b>	Standard type	MGPM
		Slide bearing

Note 1) Operate without lubrication from a pneumatic system lubricator.

Note 2) Please contact SMC for details on the maintenance intervals for this cylinder, which differ from those of the standard cylinder.

Note 3) In principle, it is impossible to make built-in magnet type and the one with auto switch. But, as for the one with auto switch, and the heat resistant cylinder with heat resistant auto switch, since it will be differed depending on the series, please contact SMC.

Note 4) Piston speed is ranged from 50 to 500 mm/s. But, for  $\phi 80$  and  $\phi 100$ , it will be 50 to 400 mm/s.

Note 5) No cushion is equipped. Check the kinetic energy.

### How to Order

**MGPM** Standard model no. **-XB6**  
Heat resistant cylinder

### Warning Precautions

Be aware that smoking cigarettes etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

### Specifications

<b>Ambient temperature range</b>	−10°C to 150°C
<b>Seal material</b>	Fluororubber
<b>Grease</b>	Heat resistant grease
<b>Specifications other than above</b>	Same as standard type

### Dimensions

[mm]	
Bore size [mm]	DA
12	(6)
16	(8)
20	(10)
25	(10)
32	(14)
40	(14)
50	20
63	20
80	25
100	30

The dimensions in ( ) are the same as standard type.

## 2 Intermediate Stroke (Using exclusive body)

Symbol

**-XB10**

Cylinder which can reduce the mounting space by using an exclusive body which does not use a spacer to achieve that, the full length dimension could be shortened when an intermediate stroke other than the standard stroke is required.

### Applicable Series

## 4 With Heavy Duty Scraper

It is suitable for using cylinders under the environment, where there are much dusts in a surrounding area by using a heavy duty scraper on the wiper ring, or using cylinders under earth and sand exposed to the die-casted equipment, construction machinery, or industrial vehicles.

### Applicable Series

Series	Model	Bearing type	
MGP-Z	Standard type	MGPM	Slide bearing
		MGPL	Ball bushing
		MGPA	High precision ball bushing

### How to Order

### Specifications

Applicable series		MGPM	MGPL/MGPA
Bearing type		Slide bearing	Ball bushing
Bore size [mm]		20, 25, 32, 40, 50, 63, 80, 100	
Minimum operating pressure	On single side	0.12 MPa	
	On both sides	0.14 MPa	
Specifications other than above		Same as standard type	

### ⚠ Caution

**Do not replace heavy duty scrapers.**

- Since heavy duty scrapers are press-fit, they must be replaced together with the holder plate assembly.

### Dimensions (Dimensions other than below are the same as standard type.)

A cylinder with scrapers on both sides

#### MGPM, MGPL, MGPA Common Dimensions [mm]

**6 Adjustable Stroke Cylinder/Adjustable Extension Type**

Symbol  
**-XC8**

It adjusts the extending stroke by the stroke adjustable mechanism equipped in the head side. (After the stroke is adjusted, with cushion on both sides is altered to single-sided, with cushion.)

**Applicable Series**

Series	Model	Bearing type
MGP-Z	Standard type	MGPM Slide bearing
		MGPL Ball bushing
	MGPA	High precision ball bushing

**How to Order**

**Precautions**

**Warning**

- When the cylinder is operating, if something gets caught between the stopper bracket for adjusting the stroke and the cylinder body, it could cause bodily injury or damage the peripheral equipment. Therefore, take preventive measures as necessary, such as installing a protective cover.
- To adjust the stroke, make sure to secure the wrench flats of the stopper bracket by a wrench etc. before loosening the lock nut. If the lock nut is loosened without securing the stopper bracket, be aware that the area that joins the load to the piston rod or the area in which the piston rod is joined with the load side and the stopper bracket side could loosen first. It may cause an accident or malfunction.

## 7 Adjustable Stroke Cylinder/Adjustable Retraction Type

**-XC9**

The retract stroke of the cylinder can be adjusted by the adjustment bolt.

### Applicable Series

Series	Model	Bearing type
MGP-Z	MGPM	Slide bearing
	MGPL	Ball bushing
	MGPA	High precision ball bushing

### How to Order

MGP<sup>M</sup><sub>A</sub><sup>L</sup> **□** Bore size - **□** Stroke **□** Stroke adjustment symbol **Z** - XC9  
Adjustable stroke cylinder/Adjustable retraction type

### Precautions

#### ⚠ Caution

- When air is supplied to the cylinder, if the stroke adjustment bolt is loosened in excess of the allowable stroke adjustment amount, be aware that the stroke adjustment bolt could fly out or air could be discharged, which could injure personnel or damage the peripheral equipment.
- Adjust the stroke when the cylinder is not pressurised. If it is adjusted in the pressurised state, the seal of the adjustment section could become deformed, leading to air leakage.

## 8 Intermediate Stroke (Spacer type)

Symbol  
**-XC19**

Dealing with the intermediate stroke by installing a spacer with the standard stroke cylinder.

### Applicable Series

Series	Model	Bearing type	
MGP-Z	With air cushion	MGPM	Slide bearing
		MGPL	Ball bushing
		MGPA	High precision ball bushing

### Applicable Stroke

<b>Description</b>	Dealing with the stroke by the 1 mm interval by changing a collar of the standard stroke cylinder. Minimum manufacturable stroke ø16 to ø63: 15 mm ø80, ø100: 20 mm Select a rubber bumper type, because the cushion effect is not obtainable for less than this stroke.	
<b>Model no.</b>	Add "-XC19" to the end of standard part number.	
<b>Applicable stroke [mm]</b>	ø16	15 to 249
	ø20 to ø63	15 to 399
	ø80, ø100	20 to 399
<b>Example</b>	Part no.: MGPM20-35AZ-XC19 15 mm width collar is installed in MGPM20-50AZ. C dimension is 112 mm.	

### How to Order

MGP<sup>M</sup><sub>L</sub><sub>A</sub> Standard model no. -XC19  
 Intermediate stroke (Spacer type)

Note) Intermediate strokes (by the 1 mm interval) with a special body are available as special products.

## 11 Bottom Mounting Type

Symbol  
**-XC82**

Since the guide rod does not protrude from the bottom at the retraction of the rod, relief holes for guide rods are not required.

### Applicable Series

Series	Model	Bearing type
MGP-Z	Standard type	MGPM
		Slide bearing

### How to Order

Note) The total length (ZZ) of the guide rod bushing is shorter than the standard products.

## 12 Grease for Food Processing Equipment

Symbol  
**-XC85**

Food grade grease (certified by NSF-H1) is used as lubricant.

### Applicable Series

Series	Model	Bearing type
MGP-Z	Standard type	MGPM
		MGPL
		MGPA
	With air cushion	MGPM
		MGPL
		MGPA

### Specifications

Ambient temperature range	0°C to 60°C
Seals material	Nitrile rubber
Grease	Grease for food
Auto switch	Mountable
Dimensions	Same as standard type
Specifications other than above	Same as standard type

### How to Order

### Warning

#### Precautions

Be aware that smoking cigarettes etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

#### Not installable zone

Food zone ..... An environment where food which will be sold as merchandise, directly touches the cylinder's components.

Splash zone ..... An environment where food which will not be sold as merchandise, directly touches the cylinder's components.

#### Installable zone

Non-food zone .... An environment where there is no contact with food.

Note 1) Avoid using this product in the food zone. (Refer to the figure on the right.)

Note 2) When the product is used in an area of liquid splash, or a water resistant function is required for the product, please consult with SMC.

Note 3) Operate without lubrication from a pneumatic system lubricator.

Note 4) Use the following grease pack for the maintenance work.

GR-H-010 (Grease: 10 g)

Note 5) Please contact SMC for details about the maintenance intervals for this cylinder, which differ from those of the standard cylinder.

100	22.5	17.5	32.5

## 14 Side Porting Type (Plug location changed)

Symbol  
**-X867**

Ports on the top plugged in order to use the piping port on the side.

### Applicable Series

Series	Model	Bearing type	
MGP-Z	Standard type	MGPM	Slide bearing
		MGPL	Ball bushing
		MGPA	High precision ball bushing
With air cushion	MGPM	Slide bearing	
	MGPL	Ball bushing	
	MGPA	High precision ball bushing	

### How to Order

MGP <sup>M</sup><sub>L</sub><sub>A</sub> Standard model no. **-X867**  
Side porting type (Plug location changed)

## Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “**Caution**,” “**Warning**” or “**Danger**.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)\*1, and other safety regulations.

 **Caution:** **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

 **Warning:** **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

 **Danger:** **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

\*1) ISO 4414: Pneumatic fluid power – General rules relating to systems.  
ISO 4413: Hydraulic fluid power – General rules relating to systems.  
IEC 60204-1: Safety of machinery – Electrical equipment of machines.  
(Part 1: General requirements)

ISO 10218-1: Manipulating industrial robots - Safety.  
etc.

### Warning

#### 1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

#### 2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

#### 3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

- The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
- When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
- Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

#### 4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

- Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
- Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue.
- An application which could have negative effects on people, property, or animals requiring special safety analysis.
- Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

### Caution

#### 1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.

If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.

If anything is unclear, contact your nearest sales branch.

## Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”.

Read and accept them before using the product.

### Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered.\*2)

Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.

2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.

This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.

3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.

\*2) **Vacuum pads are excluded from this 1 year warranty.**

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

### Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.

2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

 **Safety Instructions** Be sure to read “Handling Precautions for SMC Products” (M-E03-3) before using.
